

Figure 1: A person sitting on a large, dark, textured object, possibly a piece of machinery or a large container, in an industrial or outdoor setting.

1. The first step is to identify the problem or the goal of the project. This involves understanding the context, the stakeholders, and the resources available.

2. The second step is to define the scope of the project. This involves determining the boundaries of the project, the deliverables, and the timeline.

3. The third step is to develop a project plan. This involves creating a detailed schedule, identifying the tasks and dependencies, and allocating resources.

4. The fourth step is to execute the project plan. This involves monitoring progress, managing risks, and communicating with stakeholders.

5. The fifth step is to close the project. This involves evaluating the results, documenting lessons learned, and celebrating the success.
