# EXERCISE

1. Draw a diagram of the human skeleton showing the following bones: skull, spine, ribs, pelvis, and femur. Label each bone.

2. Write a short paragraph describing the function of the skeletal system.

3. Write the name of the bone shown in the diagram below.

4. Explain the difference between a long bone and a short bone. Give an example of each.

5. Describe the structure and function of a joint. Name the bones that meet at a joint.
