

# QUESTION 1

Figure 1 shows the structure of a cell membrane. The membrane is composed of a phospholipid bilayer. The hydrophilic heads of the phospholipids are on the outside and inside of the membrane, and the hydrophobic tails are in the middle. The membrane is also composed of various proteins and carbohydrates.

QUESTION 2

## QUESTION 2

The diagram shows a cell membrane with various proteins and carbohydrates. The membrane is composed of a phospholipid bilayer. The hydrophilic heads of the phospholipids are on the outside and inside of the membrane, and the hydrophobic tails are in the middle. The membrane is also composed of various proteins and carbohydrates.
