

NO-CURT Series INSTALLATION INSTRUCTIONS

STEP 1: VERIFY DIMENSIONS

CAUTION: Before installation, verify that the window opening is square and true. If the window opening is not square, the blind may not operate properly. Measure the window opening at the top, bottom, left, and right. The measurements should be equal. If the measurements are not equal, the window opening is not square and the blind may not operate properly. See the "Window Opening" section for more information.

STEP 2: MOUNTING

Mounting Method	Mounting Location
Inside Mount	Inside the window frame
Outside Mount	Outside the window frame
Inside Mount	Inside the window frame
Outside Mount	Outside the window frame
Inside Mount	Inside the window frame
Outside Mount	Outside the window frame

CAUTION: Do not touch the slats or the blind unit during installation. The slats and the blind unit are fragile and can be damaged by touching. Handle the blind unit by the frame only.
