

1. The first step in the process of the cell cycle is the replication of DNA.

QUESTION

1. The first step in the process of the cell cycle is the replication of DNA.

2. The second step is the condensation of the DNA into chromosomes.

3. The third step is the separation of the chromosomes.

4. The fourth step is the division of the cell.

5. The fifth step is the formation of two daughter cells.

6. The sixth step is the completion of the cell cycle.

7. The seventh step is the beginning of the next cell cycle.

8. The eighth step is the end of the cell cycle.

9. The ninth step is the start of the next cell cycle.

10. The tenth step is the completion of the cell cycle.

11. The eleventh step is the beginning of the next cell cycle.

12. The twelfth step is the end of the cell cycle.

13. The thirteenth step is the start of the next cell cycle.

14. The fourteenth step is the end of the cell cycle.

15. The fifteenth step is the start of the next cell cycle.

16. The sixteenth step is the completion of the cell cycle.
