

## QUESTION 10

Which of the following is a true statement about the relationship between the two graphs?

Graph A  
 $y = -x + 1$

Graph B  
 $y = x^2 + 1 - x$

- Which of the following is a true statement about the relationship between the two graphs?
- Graph A is a linear function and Graph B is a non-linear function.
  - Graph A is a non-linear function and Graph B is a linear function.
  - Both Graph A and Graph B are linear functions.
  - Both Graph A and Graph B are non-linear functions.

ANSWER: A

QUESTION 11
