

10. The following are the functions of the nervous system. Which one is NOT a function of the nervous system?

10.1. Control of movement

10.2. Control of the rate of heart contraction

10.3. Control of the rate of breathing

10.4. Control of body temperature

10.5. Control of blood pressure

10.6. Control of blood pH

10.7. Control of the rate of glucose breakdown

10.8. Control of the rate of protein synthesis

10.9. Control of blood volume

10.10. Control of blood glucose

10.11. Control of the rate of water reabsorption

10.12. Control of the rate of sodium reabsorption

10.13. Control of the rate of potassium reabsorption

10.14. Control of the rate of calcium reabsorption

10.15. Control of the rate of magnesium reabsorption

10.16.

10.17. Control of the rate of sodium reabsorption

10.18. Control of the rate of potassium reabsorption

10.19. Control of the rate of calcium reabsorption

10.20. The following are the functions of the nervous system. Which one is NOT a function of the nervous system?
