

# NI-CURT

NI-CURT is a software tool for the design and simulation of control systems. It is designed to be used by control engineers and researchers in the field of control systems.

NI-CURT is a software tool for the design and simulation of control systems. It is designed to be used by control engineers and researchers in the field of control systems.

NI-CURT is a software tool for the design and simulation of control systems. It is designed to be used by control engineers and researchers in the field of control systems.

## SYSTEM MODEL

- Block diagram
- Transfer function
- State space

## CONTROL DESIGN

NI-CURT provides a comprehensive set of tools for the design and simulation of control systems. It includes a graphical user interface for designing control systems, a command-line interface for running simulations, and a set of libraries for common control system blocks.
